## Guide to Mulch and Landscape Products

### Mulches

2 cubic foot bags cover 12 sq. feet at 2 inches deep

3 cubic foot bags cover 18 sq. feet at 2 inches deep

#### **Formula for figuring how much mulch to cover an area to a depth of 2 inches:**

Width in feet X length in feet = square feet to be covered (area)

Area / 12 = number of 2 cf. bags to cover area

Area / 18 = number of 3 cf. bags to cover area

Item	Size	Coverage
Manure	30 pound bag	50 square feet of garden
Lime, Pelleted or Powdered	40 or 30 pound bag	1000 square feet
Top Soil	40 pound bag	12 square feet at 1 inch deep
Pine Bark Compost	3 cf. bag	50 square feet
Bumper Crop	2 cf. bag	25 square feet
Organic Peat	30 pound bag	30 square feet
Gypsum	40 pound bag	200 square feet
Canadian Peat Moss	1 cf. bale	25 square feet
Canadian Peat Moss	2.2 cf. bale	50 square feet
Canadian Peat Moss	3.8 cf. bale	100 square feet
Straw	1 bale	300-400 square feet
Chips, rocks, and stones	0.5 cf. bag or 40 pound bag	4 square feet at 1.5 inches deep
Garden Fertilizer	50 pound bag	2000 square feet
Flat Rock	1/2 ton	Varies widely: depends on thickness 65-100 square feet at 1 stone high or a 16 foot wall at 1 foot high
Flat Rock	1.5 ton	Varies widely: depends on thickness 180-300 square feet at 1 stone high 45-50 foot wall at 1 foot high
