

Preparing for your custom “Quick-Sketch”

To ensure success during your quick-sketch visit, there are a few things we would like you to consider. Please jot down the answers to the following questions and bring along with your pictures to your **scheduled appointment**. Remember, the service is free; we just ask that you be ready to purchase and begin installing your new landscape.

- What sun exposure does the area get? Does it face North, South, East or West?
- What is the dimension of the area? If the area is a foundation planting, please include the height to the bottom of the window(s) and the location(s). Also, note the location of doors, water/gas meters, air units, etc.
- Any special circumstances? Such as: a constantly wet area, a high deer browsing area, a planting under mature trees, an area near a septic/leech bed, under utility lines, etc.
- Bring in pictures of the area.
- Keep in mind, the quick sketch is “quick” and hand drawn. Time constraints limit us to sketching one area at a time. Please allow approximately ½ hour for an appointment.
- Available appointment days vary with each season. Please call (740)763-2873 to schedule an appointment.
