## Wilson's Quick Sketch Landscape Planning Service

Quick-Sketch is the perfect solution for those who need some guidance on where and what to plant for your landscape but don't have the time or resources to devote to a comprehensive plan. You can get started on your planting project immediately, and there is no charge for this service.

### Preparing for your custom "Quick-Sketch"

To ensure success during your quick-sketch visit, there are a few things we would like you to consider. Please jot down the answers to the following questions and bring along with your pictures to your scheduled appointment. Remember, the service is free; we just ask that you be ready to purchase and begin installing your new landscape.

- What sun exposure does the area get? Does it face North, South, East or West?
- What is the dimension of the area? If the area is a foundation planting, please include the height to the bottom of the window(s) and the location(s). Also, note the location of doors, water/gas meters, air units, etc.
- Any special circumstances? Such as: a constantly wet area, a high deer browsing area, a planting under mature trees, an area near a septic/leech bed, under utility lines, etc.
- If you don't have the capability of printing your photos, just bring in your camera or memory card and we'll do it for you.

We also offer the "We Plan, You Plant" Service for those who would like a more in-depth professional plan. This type of service would greatly benefit those who are not quite ready to begin their project or those with a large or difficult project. [Click here](#) for more details on the "We Plan, You Plant" service.
