Six Steps to a Picture Perfect Landscape

1 Think 4 Seasons

You want your landscape to be interesting and beautiful in all seasons. This is accomplished by choosing plants which have features that are pleasing in each season. We will help you choose the right combination of plants that give you joy no matter when you walk your yard.

2 Know how big your plants will grow

Some plants look cute and cuddly in the nursery but grow into monsters in the wrong spot in your landscape. We specialize in plants that are easily managed and take very little care. Match up the right plant for your spot with our guidance.

3 Repetition is not boring in the landscape

To please your traveling eye, you need to have focal points in the landscape. To give you a sense of organization and serenity, repeat groupings of plants. Most plants look better in groupings of 3 or 5 or more and give more visual impact. Using the same mulch in all of your beds and plantings will help tie in the look of the landscape. Our knowledgeable staff can help you choose the proper groupings for a professional looking finish.

4 Plant with Love

We recommend using 1-2-3 when you plant. That means mix BUMPER CROP (enriched organic compost blend) in the hole, add MASTER START (starter fertilizer) in the bottom of the hole, and soak the root ball with ROOTMASTER (Rooting enhancer). We double the guarantee when you buy these ingredients and use them. Never bury the root ball above the top of the root ball. It is better to plant shallow and mulch the difference.

Follow our Planting Guide instructions, and you will have success. You can print a planting guide from [here](#) or pick one up at the garden center.

5 Add by taking away

Trimming trees and shrubs encourages bushiness. Remove dead wood anytime. Prune spring blooming trees and shrubs immediately after they bloom. All others may be pruned in late winter. Prune back to a side branch so that there is no large stub. Fertilize trees and shrubs in very late fall or after they flower in spring.

6 Rely on the advice of your Consultants at Wilson's

We want to partner with you so that your plants continue to thrive throughout the years. Never hesitate on stopping by and seeking advice about any particular problem you may be experiencing. The advice is free and helpful in keeping your landscape tip-top.
